Legend – basis, method and limits of this document

DRAFT v9 – private analytical model based on owner's declarations and public data; not an appraisal, audit or legal/tax advice – see Legend

Topic	Explanation
1. Status of the document	DRAFT private analytical financial model, version 9, dated 31 October 2026, prepared for the owner's own use and for review by legal counsel. It was produced with the help of an AI assistant (Perplexity) from (i) statements made by the owner (the "declarant") and (ii) public web sources consulted on 30–31 October 2026. It is NOT an expert appraisal (perizia di stima / CTU report), an audit, an accounting statement, or legal or tax advice, and it has no evidentiary value on its own. Every figure must be verified against original documents before any use in negotiations or proceedings (see the Evidence sheet).
2. Origin of every figure	Each input is classified in its comment: [D] = declared by the owner (an event or amount reported from memory, not yet documented); [P] = public price – the arithmetic mean (or the single value) of prices published online by third parties, never a transaction price; [R] = official rate of the Bank of Russia; [A] = assumption of the model's author, shown with yellow fill. Combinations such as [D/A] mean a declared fact completed by an assumption. Where several public prices were found, the arithmetic mean is used; the individual prices and links are in the Capex and Sources sheets.
3. Colour code and editing	Blue font = typed input or sourced value. Black = formula. Yellow fill = assumption to be replaced with documents. Grey fill = key total. No sheet is hidden or protected, there are no macros and no external links: every figure can be traced to its formula, and any input can be changed, after which all results recalculate. The Italian sheets are linked copies: change numbers in the English sheets.
4. Sheets	Summary; Scenarios (three cases); Legend; Evidence (documents needed); Inputs; Prices (price observations); UK_Costs (management company payments, window washing, official EUR rates by year); Utilities (tariff × consumption); Capex (renovation, capital works, furniture, set-up and one-off costs by year); PnL (yearly profit and loss); Sources (clickable links). Italian copies: Riepilogo, Scenari, Legenda, Prove, Parametri, Prezzi, Costi_UK, Utenze, Spese_Capex, Conto_Economico, Fonti.
5. Period and rented months	The period runs from January 2020 to 31 October 2026 (2026 = 10 months). Each apartment is counted from its declared rental start (Inputs rows 21–24). Apartment-months = rented months of apartment 1 + apartment 2. Costs and events before the rental start (for example 2018–2019) are not modelled.
6. Rental income	Potential rent = base monthly rent × apartment-months. Rental income = potential rent × occupancy (70%, declared for 2023 and extended to all years). Vacancy loss = the difference. Rent is assumed constant across years; no rent indexation is modelled.
7. Running costs	UK + utilities: monthly payment per apartment (UK_Costs row 6) × apartment-months; utilities are estimated as tariff × assumed consumption and the remainder is shown as management fee and concierge. Window washing: annual amount ÷ 12 × apartment-months. Internet: monthly amount × apartment-months. Agent commission and major cleaning at tenant change: amount × tenant changes per year × apartment-months ÷ 12. Property tax: cadastral value × rate × apartments × months ÷ 12, accrued from the purchase year.
8. Capital items	Major = fit-out, front doors, electrical wiring (apartment 2), ventilation change – treated as invested capital. Maint = refresh and furniture replacement – in operating costs. OneOff = cleaning after renovation, Wi-Fi/communications set-up, meters, penalty, sewer leak – in operating costs. The calculation of each average price is visible in the Fixed RUB cell and the Basis column of the Capex sheet.
9. Public prices and market value	Public prices are asking or list prices found on commercial websites; they are not transaction prices and not an appraisal. The arithmetic mean is used only to obtain a neutral estimate where no invoice is available. Pages were read on 30–31 October 2026 and may change. The market value of the apartments rests on a single asking price (RUB 22.0m for a 39.1 m² unit) and must be replaced by an independent appraisal by a licensed appraiser for any formal use.
10. Exchange rates	Only official Bank of Russia rates are used. The purchase price (entered in EUR) is converted into RUB at the annual average rate of the purchase year; yearly profits are converted into EUR at the annual average rate of each year (UK_Costs row 8); renovation and capital works at the average rate of their year; current values at the official rate of 30.10.2026 (89.8167). 2026 uses the latter because the year is incomplete. Annual averages are an approximation of the rates on the actual payment dates, which should replace them when known.
11. Results	Net profit = rental income − operating costs (before income tax unless a rate is entered in Inputs row 20). Unrealised gain = market value − invested capital. Total result = unrealised gain + net profit. It is not an IRR: it ignores the timing of cash flows, inflation, selling costs, financing and taxes on a sale.
12. The three cases	Case 1: invested capital = purchase price only; renovation and capital works are ignored. Case 2: they are added to invested capital (equals Summary). Case 3: co-ownership – purchase price and market value split by ownership share (Inputs C28: 65% declarant / 35% Eugene, declared but unconfirmed); renovation, capital works, furniture, installation, maintenance, set-up costs, one-offs and all running costs are declared to be paid 100% by the declarant; all rent is received by the declarant; property tax is split by Inputs C29. No settlement between co-owners for the value added by the declarant's works is modelled.
13. Not modelled	Costs and taxes before the rental start; land-plot payments outside the management company charges; income tax on rent; selling costs; financing; inflation; legal costs; any dispute or settlement between co-owners or with tenants.

14. Use in Italian proceedings	If any of this material is to be used before an Italian court or authority, source documents in Russian will normally need a sworn or certified translation (traduzione asseverata / giurata) and, for foreign public documents, an apostille or legalisation where applicable; admissibility and weight are for counsel and the court. The Italian sheets are a courtesy translation produced with an AI tool; they are not a certified translation, and the English sheets prevail in case of discrepancy. Nothing in this workbook is legal advice.
15. Rounding and reproducibility	Calculations use full precision; amounts are displayed rounded to whole units, so totals may differ by small amounts from the sum of displayed figures. All results come from spreadsheet formulas and can be reproduced by recalculating the workbook.
16. Review log (version 9)	Version 8 → 9: neutral wording (“declarant” instead of “you/me”); every input tagged [D]/[P]/[R]/[A]; Evidence sheet added; statements on method, limits, valuation and use in proceedings added; Italian sheets rebuilt from the same text; calculation logic and amounts unchanged.

Legenda – base, metodo e limiti di questo documento

BOZZA v9 – modello analitico privato basato su dichiarazioni del proprietario e dati pubblici; non è una perizia, una revisione contabile né una consulenza legale/fiscale – vedi Legenda

Argomento	Spiegazione
1. Natura del documento	BOZZA di modello finanziario analitico privato, versione 9, datata 31 ottobre 2026, predisposta per uso proprio del proprietario e per la revisione da parte di consulenti legali. È stata prodotta con l'ausilio di un assistente di intelligenza artificiale (Perplexity) sulla base di (i) dichiarazioni del proprietario (il «dichiarante») e (ii) fonti web pubbliche consultate il 30–31 ottobre 2026. NON è una perizia di stima (relazione di CTU), una revisione contabile, un bilancio né una consulenza legale o fiscale e non ha da sola valore probatorio. Ogni cifra deve essere verificata su documenti originali prima di qualsiasi uso in trattative o procedimenti (vedi foglio Prove).
2. Origine di ogni dato	Ogni dato inserito è classificato nel commento: [D] = dichiarato dal proprietario (evento o importo riferito a memoria, non ancora documentato); [P] = prezzo pubblico – media aritmetica (o valore unico) di prezzi pubblicati online da terzi, mai un prezzo di compravendita; [R] = cambio ufficiale della Banca di Russia; [A] = ipotesi dell'autore del modello, evidenziata in giallo. Combinazioni come [D/A] indicano un fatto dichiarato completato da un'ipotesi. Quando sono stati trovati più prezzi pubblici si usa la media aritmetica; i singoli prezzi e i link sono nei fogli Spese_Capex e Fonti.
3. Codice colori e modifica	Carattere blu = dato inserito o valore da fonte. Nero = formula. Sfondo giallo = ipotesi da sostituire con documenti. Sfondo grigio = totale chiave. Nessun foglio è nascosto o protetto, non vi sono macro né collegamenti esterni: ogni cifra è riconducibile alla sua formula e ogni dato può essere modificato, dopodiché tutti i risultati si ricalcolano. I fogli in italiano sono copie collegate: modificare i numeri nei fogli in inglese.
4. Fogli	Riepilogo; Scenari (tre casi); Legenda; Prove (documenti necessari); Parametri; Prezzi (rilevazioni di prezzo); Costi_UK (pagamenti alla società di gestione, lavaggio vetri, cambi EUR ufficiali per anno); Utenze (tariffa × consumo); Spese_Capex (ristrutturazione, opere in conto capitale, arredi, costi di avvio e una tantum per anno); Conto_Economico (conto economico annuale); Fonti (link cliccabili). Copie in inglese: Summary, Scenarios, Legend, Evidence, Inputs, Prices, UK_Costs, Utilities, Capex, PnL, Sources.
5. Periodo e mesi affittati	Il periodo va da gennaio 2020 al 31 ottobre 2026 (2026 = 10 mesi). Ogni appartamento è contato dall'inizio della locazione dichiarato (Parametri righe 21–24). Mesi-appartamento = mesi affittati dell'appartamento 1 + appartamento 2. I costi e gli eventi precedenti all'inizio della locazione (ad esempio 2018–2019) non sono modellati.
6. Ricavi da locazione	Affitto potenziale = affitto mensile base × mesi-appartamento. Ricavi da locazione = affitto potenziale × occupazione (70%, dichiarata per il 2023 ed estesa a tutti gli anni). Perdita per sfitto = la differenza. L'affitto è ipotizzato costante negli anni; non è modellata alcuna indicizzazione.
7. Costi correnti	UK + utenze: pagamento mensile per appartamento (Costi_UK riga 6) × mesi-appartamento; le utenze sono stimate come tariffa × consumo ipotizzato e il resto è mostrato come spese di gestione e portineria. Lavaggio vetri: importo annuo ÷ 12 × mesi-appartamento. Internet: importo mensile × mesi-appartamento. Commissione agenzia e pulizia straordinaria al cambio inquilino: importo × cambi inquilino all'anno × mesi-appartamento ÷ 12. Imposta sugli immobili: valore catastale × aliquota × appartamenti × mesi ÷ 12, maturata dall'anno di acquisto.
8. Voci in conto capitale	Principale = allestimento, porte blindate, impianto elettrico (appartamento 2), sostituzione ventilazione – trattati come capitale investito. Manut. = rinfrescata e sostituzione arredi – nei costi operativi. Una tantum = pulizia post-ristrutturazione, installazione Wi-Fi/comunicazioni, contatori, sanzione, perdita fognaria – nei costi operativi. Il calcolo di ogni prezzo medio è visibile nella cella RUB fissi e nella colonna Base del foglio Spese_Capex.
9. Prezzi pubblici e valore di mercato	I prezzi pubblici sono prezzi richiesti o di listino trovati su siti commerciali; non sono prezzi di compravendita né una perizia. La media aritmetica serve solo a ottenere una stima neutra in assenza di fatture. Le pagine sono state lette il 30–31 ottobre 2026 e possono cambiare. Il valore di mercato degli appartamenti poggia su un solo prezzo richiesto (RUB 22,0 mln per un'unità di 39,1 m²) e per qualsiasi uso formale deve essere sostituito da una perizia indipendente di un perito abilitato.
10. Tassi di cambio	Si usano soltanto i cambi ufficiali della Banca di Russia. Il prezzo di acquisto (inserito in EUR) è convertito in RUB al cambio medio annuo dell'anno di acquisto; gli utili annuali sono convertiti in EUR al cambio medio annuo di ciascun anno (Costi_UK riga 8); ristrutturazione e opere al cambio medio del loro anno; i valori correnti al cambio ufficiale del 30.10.2026 (89,8167). Il 2026 usa quest'ultimo perché l'anno è incompleto. Le medie annue approssimano i cambi alle date effettive dei pagamenti, che dovranno sostituirle quando noti.
11. Risultati	Utile netto = ricavi da locazione − costi operativi (prima dell'imposta sul reddito, salvo aliquota inserita in Parametri riga 20). Plusvalenza non realizzata = valore di mercato − capitale investito. Risultato totale = plusvalenza non realizzata + utile netto. Non è un IRR: ignora la tempistica dei flussi di cassa, l'inflazione, i costi di vendita, il finanziamento e le imposte sulla vendita.

12. I tre casi	Caso 1: capitale investito = solo prezzo di acquisto; ristrutturazione e opere sono ignorate. Caso 2: sono aggiunte al capitale investito (coincide con il Riepilogo). Caso 3: comproprietà – prezzo di acquisto e valore di mercato ripartiti per quota di proprietà (Parametri C28: 65% dichiarante / 35% Eugene, dichiarato ma non confermato); ristrutturazione, opere, arredi, installazione, manutenzione, costi di avvio, una tantum e tutti i costi correnti sono dichiarati pagati al 100% dal dichiarante; tutto l'affitto è incassato dal dichiarante; l'imposta sugli immobili è ripartita secondo Parametri C29. Non è modellato alcun conguaglio tra i comproprietari per il valore aggiunto dalle opere del dichiarante.
13. Non modellato	Costi e imposte precedenti all'inizio della locazione; pagamenti per il terreno al di fuori delle spese della società di gestione; imposta sul reddito sugli affitti; costi di vendita; finanziamento; inflazione; spese legali; qualsiasi controversia o accordo tra comproprietari o con gli inquilini.
14. Uso in procedimenti italiani	Se questo materiale dovesse essere utilizzato dinanzi a un giudice o a un'autorità italiana, i documenti di origine in lingua russa richiederanno normalmente una traduzione asseverata / giurata e, per gli atti pubblici stranieri, un'apostille o la legalizzazione ove applicabile; ammissibilità e valore probatorio spettano al difensore e al giudice. I fogli in italiano sono una traduzione di cortesia prodotta con uno strumento di IA; non sono una traduzione certificata e in caso di discrepanza prevalgono i fogli in inglese. Nulla in questa cartella di lavoro costituisce consulenza legale.
15. Arrotondamenti e riproducibilità	I calcoli usano la piena precisione; gli importi sono mostrati arrotondati all'unità, quindi i totali possono differire di piccoli importi dalla somma delle cifre mostrate. Tutti i risultati derivano da formule del foglio di calcolo e sono riproducibili ricalcolando la cartella.
16. Registro delle revisioni (versione 9)	Versione 8 → 9: formulazione neutra («dichiarante» al posto di «tu/io»); ogni dato classificato [D]/[P]/[R]/[A]; aggiunto il foglio Prove; aggiunte dichiarazioni su metodo, limiti, valutazione e uso in procedimenti; fogli in italiano ricostruiti dallo stesso testo; logica di calcolo e importi invariati.

Evidence register – documents needed to substantiate each figure

Until these documents are collected, the corresponding figures are declarations or estimates and have no evidentiary value on their own

Item	Declared / estimated value	Documents that would substantiate it	Status
Purchase of the two apartments (price, date, currency)	5,000 EUR/m² × 80 m²; year assumed 2018	Purchase contracts, EGRN extracts, bank transfers / payment orders	To be collected
Ownership split with Eugene	65% / 35% (uncertain)	Title documents, co-ownership or loan agreements, proof of each party's payments	To be collected
Renovation, front doors, wiring, ventilation	Estimated from public price lists	Contractor contracts, acceptance acts, invoices, receipts, bank transfers	To be collected
Furniture and appliances	Placeholder RUB 400,000 per apartment	Purchase receipts, delivery notes, bank statements	To be collected
Rental periods and tenants	Apartment 1 from Oct 2020 (uncertain); apartment 2 from 2022	Lease agreements, handover acts, tenant registration, agency contracts	To be collected
Rent received and occupancy	RUB 70–90k per month; 70% occupancy (2023)	Bank statements showing rent receipts; lease calendar	To be collected
UK Tribeca charges and utilities	RUB 16–23k per month per apartment	Statements and invoices of the management company, personal account export, payment confirmations	To be collected
One-off events (meters, smoke-detection penalty, sewer leak and neighbours)	About RUB 20k, RUB 10k, EUR 2k	Acts, penalty notices, repair invoices, settlement with neighbours and proof of payment	To be collected
Property tax and cadastral value	Assumed 70% of price; rate 0.5%	Tax notices of the Federal Tax Service, EGRN extract with cadastral value	To be collected
Market value today	Single asking price RUB 22.0m for 39.1 m²	Independent appraisal by a licensed appraiser; comparable closed transactions	To be collected
Exchange rates	Bank of Russia official rates	Official Bank of Russia rate for the exact payment dates (cbr.ru)	To be collected

Registro delle prove – documenti necessari per comprovare ogni dato

Finché questi documenti non sono raccolti, i dati corrispondenti sono dichiarazioni o stime e non hanno da soli valore probatorio

Voce	Valore dichiarato / stimato	Documenti che lo comproverebbero	Stato
Acquisto dei due appartamenti (prezzo, data, valuta)	5.000 EUR/m² × 80 m²; anno ipotizzato 2018	Contratti di acquisto, estratti EGRN, bonifici / ordini di pagamento	Da raccogliere
Ripartizione della proprietà con Eugene	65% / 35% (incerto)	Titoli di proprietà, accordi di comproprietà o di prestito, prova dei pagamenti di ciascuna parte	Da raccogliere
Ristrutturazione, porte blindate, impianto elettrico, ventilazione	Stimati da listini pubblici	Contratti con gli appaltatori, atti di collaudo, fatture, ricevute, bonifici	Da raccogliere
Arredi ed elettrodomestici	Segnaposto RUB 400.000 per appartamento	Ricevute di acquisto, bolle di consegna, estratti conto	Da raccogliere
Periodi di locazione e inquilini	Appartamento 1 da ott. 2020 (incerto); appartamento 2 dal 2022	Contratti di locazione, verbali di consegna, registrazione degli inquilini, contratti con l'agenzia	Da raccogliere
Affitti incassati e occupazione	RUB 70–90k al mese; occupazione 70% (2023)	Estratti conto con gli incassi; calendario dei contratti	Da raccogliere
Spese UK Tribeca e utenze	RUB 16–23k al mese per appartamento	Estratti e fatture della società di gestione, esportazione dell'area personale, conferme di pagamento	Da raccogliere
Eventi una tantum (contatori, sanzione rilevatori di fumo, perdita fognaria e vicini)	Circa RUB 20k, RUB 10k, EUR 2k	Atti, avvisi di sanzione, fatture di riparazione, accordo con i vicini e prova di pagamento	Da raccogliere
Imposta sugli immobili e valore catastale	Ipotizzato 70% del prezzo; aliquota 0,5%	Avvisi di pagamento del Servizio fiscale federale, estratto EGRN con valore catastale	Da raccogliere
Valore di mercato oggi	Singolo prezzo richiesto RUB 22,0 mln per 39,1 m²	Perizia di stima indipendente di un perito abilitato; compravendite comparabili concluse	Da raccogliere
Tassi di cambio	Cambi ufficiali della Banca di Russia	Cambio ufficiale della Banca di Russia alle date esatte dei pagamenti (cbr.ru)	Da raccogliere

Summary – two 40 m² apartments, Tribeca Apartments, Moscow

DRAFT v9 – private analytical model based on owner's declarations and public data; not an appraisal, audit or legal/tax advice – see Legend

Item	RUB	EUR		
Purchase price (2 apartments)	29,581,840	400,000		
Renovation and capital works (fit-out, doors, wiring, ventilation)	4,022,767	47,406		
Total invested	**33,604,607**	**447,406**		
Market value today (single asking price – not an appraisal)	45,012,788	501,163		
Unrealised gain (value − invested)	11,408,181	53,757		
Net profit 2020–Oct 2026 (after all operating costs)	777,709	10,870		
Total result (gain + net profit)	**12,185,890**	**64,627**		
Total result, % of invested	36.3%			
Net profit 2025, % of invested	-1.4%			
Of which: property tax	707,499			
Of which: refresh + furniture	1,760,000			
Of which: one-off and set-up costs	275,433			
Of which: internet / communications + cleaning at tenant change	188,858			
Market value per m² today, EUR	6,265			

Rent scenarios, whole period (100% ownership)

Scenario	Rent/month, RUB	Gross rental income, RUB	Net profit, RUB	Net profit, EUR (rate of 30.10.2026)
Low	70,000	6,419,000	(30,124)	(335)
Base	80,000	7,336,000	777,709	8,659
High	90,000	8,253,000	1,585,543	17,653

Basis: [D] facts declared by the owner, [P] arithmetic means of public price lists, [R] official Bank of Russia rates, [A] explicit assumptions (see Legend). All figures are estimates until supported by original documents (see Evidence sheet).

Three scenarios – whole period 2020 – Oct 2026

Case 1: without renovation and capital works | Case 2: with them | Case 3: co-ownership (declarant and Eugene), renovation and capital works paid 100% by the declarant

RUB	Case 1 – without renovation and capital works	Case 2 – with renovation and capital works	Case 3 – DECLARANT (co-ownership)	Case 3 – EUGENE (co-owner)	Case 3 – TOTAL
Purchase price paid	29,581,840	29,581,840	19,228,196	10,353,644	29,581,840
Renovation and capital works paid	-	4,022,767	4,022,767	-	4,022,767
Total invested	**29,581,840**	**33,604,607**	**23,250,963**	**10,353,644**	**33,604,607**
Market value share today	45,012,788	45,012,788	29,258,312	15,754,476	45,012,788
Unrealised gain (value − invested)	15,430,948	11,408,181	6,007,349	5,400,832	11,408,181
Rental income received	7,336,000	7,336,000	7,336,000	-	7,336,000
Running costs excl. property tax (UK+utilities, window washing, communications, agent, cleaning, set-up, one-offs, refresh, furniture)	5,850,792	5,850,792	5,850,792	-	5,850,792
Property tax	707,499	707,499	459,874	247,625	707,499
Net profit from operations (before income tax)	**777,709**	**777,709**	**1,025,334**	**(247,625)**	**777,709**
Cash result after renovation and capital works	777,709	(3,245,057)	(2,997,433)	(247,625)	(3,245,057)
Total result (gain + net profit)	**16,208,657**	**12,185,890**	**7,032,683**	**5,153,207**	**12,185,890**
Total result, % of invested	54.8%	36.3%	30.2%	49.8%	36.3%
Average net profit per apartment-month (÷ apartment-months)	5,937	5,937	7,827	(1,890)	5,937
Average net profit per PAID month (÷ apartment-months × occupancy)	8,481	8,481	11,181	(2,700)	8,481
Net profit from operations, EUR (Bank of Russia average rate of each year)	10,870	10,870	13,700	(2,830)	10,870
Total invested, EUR (rates of purchase and renovation years)	400,000	447,406	307,406	140,000	447,406
Market value share, EUR (rate of 30.10.2026)	501,163	501,163	325,756	175,407	501,163
Total result, EUR	**112,033**	**64,627**	**32,050**	**32,577**	**64,627**

Case 1 ignores renovation and capital works (return on the purchase price only). Case 2 adds them to invested capital (same as Summary). Case 3: purchase price and market value are split by ownership share (Inputs C28, declared 65%/35% but unconfirmed); renovation, capital works, furniture, installation, maintenance, set-up costs, one-offs and all running costs are declared to be paid 100% by the declarant; all rent is received by the declarant; property tax is split by Inputs C29. Eugene's column shows his side for reference. No settlement between co-owners for the value added by the declarant's works is modelled. Income tax is not applied.

Yearly view (RUB)

RUB	2020	2021	2022	2023	2024	2025	2026	Total
Cases 1 & 2: net profit from operations (100% ownership)	(28,261)	239,264	581,864	497,864	(445,770)	(462,136)	394,886	777,709
Case 2: renovation and capital works paid	1,921,023	2,101,743	-	-	-	-	-	4,022,767
Case 2: cash result after renovation and capital works	**(1,949,285)**	**(1,862,480)**	**581,864**	**497,864**	**(445,770)**	**(462,136)**	**394,886**	**(3,245,057)**
Case 3 (declarant): rental income	168,000	672,000	1,344,000	1,344,000	1,344,000	1,344,000	1,120,000	7,336,000
Case 3 (declarant): running costs excl. property tax	92,725	329,200	658,600	742,600	1,686,233	1,702,600	638,833	5,850,792
Case 3 (declarant): share of property tax	67,299	67,299	67,299	67,299	67,299	67,299	56,082	459,874

Cash result after renovation and capital works	**(1,949,285)**	**(1,862,480)**	**581,864**	**497,864**	**(445,770)**	**(462,136)**	**394,886**	**(3,245,057)**

Property tax accrues for every year from the purchase year. Renovation and capital works appear as a memo line (capex). Cost lines are positive; vacancy loss and tenant recharge are negative. Costs before the rental start are not modelled. See Scenarios for the ownership split.

Inputs – two apartments, Tribeca Apartments, Moscow

DRAFT v9 – private analytical model based on owner's declarations and public data; not an appraisal, audit or legal/tax advice – see Legend

Parameter	Value	Source / comment
Area per apartment, m²	40	[D] Two apartments of 40 m² each, as declared
Number of apartments	2	[D] As declared
Purchase price, EUR per m² (shell & core)	5,000	[D] As declared; currency assumed to be EUR – confirm with the purchase contract
Purchase year	2018	[A] Not declared; the first dated price found is March 2018 – replace with the contract date
RUB per EUR in the purchase year	73.9546	[R] Bank of Russia annual average 2018 (myfin.by archive of CBR data); replace with the official rate on the payment date
Major renovation (fit-out), RUB per m²	45,000	[P] 2026 benchmark for designer renovation (nakopilo.ru); replace with the amounts in the renovation contracts
Market value today, RUB per m²	562,660	[P] Single asking price: 39.1 m² unit at RUB 22.0m (mirkvartir.ru). Not an appraisal – a licensed appraisal is needed for formal use
RUB per EUR today (30.10.2026)	89.8167	[R] Official Bank of Russia rate of 30.10.2026
Occupancy (applied to all rental months)	70.0%	[D/A] Declared for 2023; extended to all other years by assumption
Rent per full month per apartment, low (RUB)	70,000	[D] Lower end of the declared range
Rent per full month per apartment, base (RUB)	80,000	[D/A] Midpoint of the declared range; assumed constant across years
Rent per full month per apartment, high (RUB)	90,000	[D] Upper end of the declared range
Agent fee, months of rent per tenant change	1.0	[A] No documents available
Tenant changes per year per apartment	1.0	[A] No documents available
Utilities reimbursed by tenant, %	0.0%	[A] 0% = owner bears utilities (conservative)
Income tax rate applied in the P&L	0.0%	[A] 0% = results shown before income tax
Apartment 1 – rental start year	2020	[D] Declared ("October 2020, I think")
Apartment 1 – rental start month	10	[D/A] Month declared with uncertainty
Apartment 2 – rental start year	2022	[D] Declared
Apartment 2 – rental start month	1	[A] Month not declared; January assumed
Cadastral value as % of purchase price	70.0%	[A] Replace with the cadastral value in the EGRN extract (Rosreestr)
Property tax rate on cadastral value	0.50%	[P] Moscow: 0.5% typical for apartments (non-residential premises); 2% if the building is on the list of business/retail centres (mos.ru) – verify for the building
Cadastral value per apartment, RUB	10,353,644	[A] Formula – overwrite with the value from the property tax notice
Case 3: declarant's share of purchase price and of market value	65.0%	[D/A] Declared 65% (declarant) / 35% (Eugene) but not certain – confirm from payment records and title documents
Case 3: declarant's share of property tax	65.0%	[A] Follows the ownership share; overwrite if the declarant pays all
Major cleaning, RUB per apartment (average)	8,900	[P] Arithmetic mean of mos-clean.ru (up to 40 m²: 10,800) and standartcleaning.ru (up to 50 m²: 7,000)
Internet / communications, RUB per apartment per month	700	[P] Typical Moscow home internet 450–910 RUB/month (justconnect.ru, moskvaonline.ru)

Renovation, capital works, furniture, set-up and one-off costs

Types: Major = renovation and capital works (capex); Maint = refresh and furniture; OneOff = set-up and irregular costs. Prices are arithmetic means of the public price lists listed on the Sources sheet

Item	Type	Apartment	Year (assumed)	RUB per m²	Fixed RUB	Area, m²	Count	Total, RUB	Basis / comment	RUB per EUR (Bank of Russia avg of year)	Total, EUR
